NEW ENGLISH CHRYSANTHEMUMS

STOCK CLUMPS

Those of you who ordered these Chrysanthemums from us last year need no introduction to them. These Chrysanthemums are early blooming, making it possible to raise them where Chrysanthemums have never been raised before.

If you are looking for something to pep up your catalogue or price list for your retail sales, these will certainly do it. We sell more of these new Chrysanthemums retail than all other perennials together.

These can be grown without disbudding but if you will grow them disbudded down to 8 to 12 blooms to the plant it is almost unbelievable the lovely flowers you can raise.

We have a very limited number of Stock Clumps to offer this fall. If you buy Stock Clumps now and plant them in the greenhouse they will soon start throwing side shoots and you can grow enough rooted cuttings to give yourself a good start to plant out by spring. We have always paid from 20c to 50c each for small rooted cuttings, besides the import duty on them, so you have a wonderful opportunity to get a good start reasonable.

Please get your order in early as help is scarce and it will help us to have your orders in early.

These are nice field grown clumps. Most of them will have several strong side shoots on them.

If you want to buy clumps you must do it now as in the spring we will be offering rooted cuttings only at just about the price we are asking for these field grown clumps now.

DELPHINIUM—Pacific Hybrids

By far the best strain of Delphinium that we have found and we have tried out all of the good ones advertised. These really are something. Fine strong young plants. These are a year old and gave us good saleable spikes this fall. This size is the only size to buy. Don't every buy plants that are two or three years old.

Strong One-Year Plants, \$10.00 per 100

CARNATIONS—Hardy

VERONICA—Cuppresiodies

A very lovely low-growing evergreen shrub. Makes a cushion-like shaped plant a foot or a little over tall, and possibly 2 feet or a little over wide. Bright dark green the year around. GLADIOLUS

WANDA. Have you tried Wanda? You all know Picardy—Wanda is a cream colored sport of Picardy. We supplied all the cut Gladiolus for both of the flower shops in Lewiston this summer and they both were partial to Wanda. In make-up work it seems to harmonize much better with other colors than any of the white varieties do. Also it is a very prolific multiflier and doesn't seem to have any faults.

You all know this good Boxwood. It is so good along drives and to border flower beds. We have some wonderfully strong rooted cuttings that have a wonderful root system, having been rooted since April. These are 4 inches tall and most of them are branched. If you want some Boxwood you will be sure to be pleased with these.

DAISIES

ESTER READ. The sensational new Daisy that the florists are using all over the country. They take dye well. Thousands of them were dyed pink and used in Shirley Temple's wedding decorations. Plants for early spring delivery, grown from divisions, \$10.00 per 100.

MOUNT SHASTA. This is a still newer Daisy that is supposed to be an improvement on Ester Read. The only difference we can see is that the stems seem to be a trifle longer and they bloom a little later in the fall. Both of these varieties have bloomed all summer for us. Plants for early spring delivery (grown from divisions), \$15.00 per 100.

SPECIAL NOTICE—Everything on this list ready to ship except the Violets and Daisies, which are for spring delivery. All orders sent express collect. Be sure to give express office.
